Flying Ship Technologies Partners with ZEBOX on Green Logistics Solutions

Leesburg, Va. – Flying Ship Technologies, Corp. is excited to announce it has partnered with ZEBOX, a global accelerator network of entrepreneurs, industry leaders and ecosystem experts focused on supply chain innovation. Initiated by Rodolphe Saadé, Chairman and CEO of the CMA CGM Group, ZEBOX bridges the gap between startups and large companies to help them innovate together and foster new solutions to shape the supply chain of the future.

“Flying Ship Technologies shares the ZEBOX vision and is thrilled to partner with them to revolutionize maritime shipping and improve global supply chains,” said Flying Ship Technologies Founder and CEO, Bill Peterson. “Our environmentally friendly, autonomous ground effect vessels align directly with their top focus areas of operational efficiency and decarbonization. Flying Ships will be able to expand to previously unavailable markets through this collaboration with global leaders in logistics and transportation. We look forward to working with them.”

“ZEBOX’ mission is to source the most innovative early-stage technologies throughout the global supply chain and find opportunities for the deployment of those technologies within our world class corporate partner base,” said Charley Dehoney, VP of ZEBOX America. “I have been in touch with the Flying Ship Company for nearly two years and have tracked the development of their product and business. After achieving significant traction and meeting key viability milestones, ZEBOX is thrilled to partner with the team at Flying Ship Co. to further their progress towards enabling unmanned, autonomous ground effect delivery at a global scale.”

“Their solution is critically important for humanitarian and disaster relief efforts as well as reaching emerging economies more quickly and cost-effectively,” Dehoney continued. “Our corporate partners and their customers will benefit greatly by having access to Flying Ship’s technology and we look forward to enabling the further commercialization of this groundbreaking technology.”

About Flying Ship Technologies, Corp.

Flying Ship Technologies, Corp. has developed autonomous ground effect vessels that travel just over the water to provide fast, cost-effective delivery of time-critical, price-sensitive goods. Ten times faster than boats and one-quarter of the cost to maintain and operate compared to planes, Flying Ships operate to tens of thousands of additional coastal access points and are dramatically cleaner for the environment.
